

## BYOD User Guide

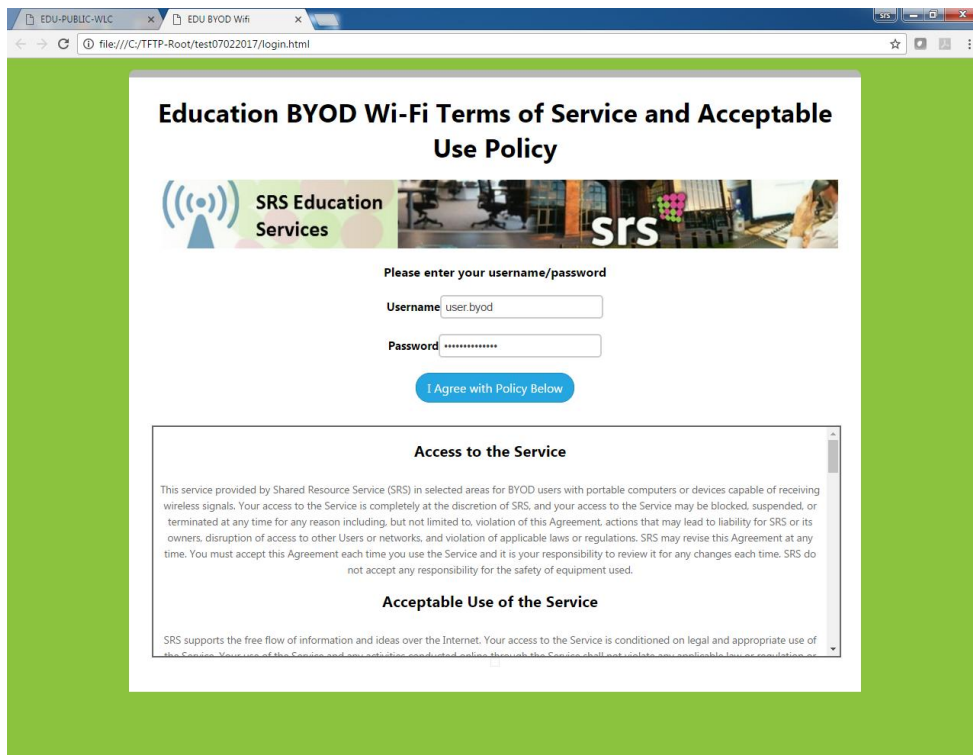

Firstly connect your device to the MON BYOD Wireless Network .

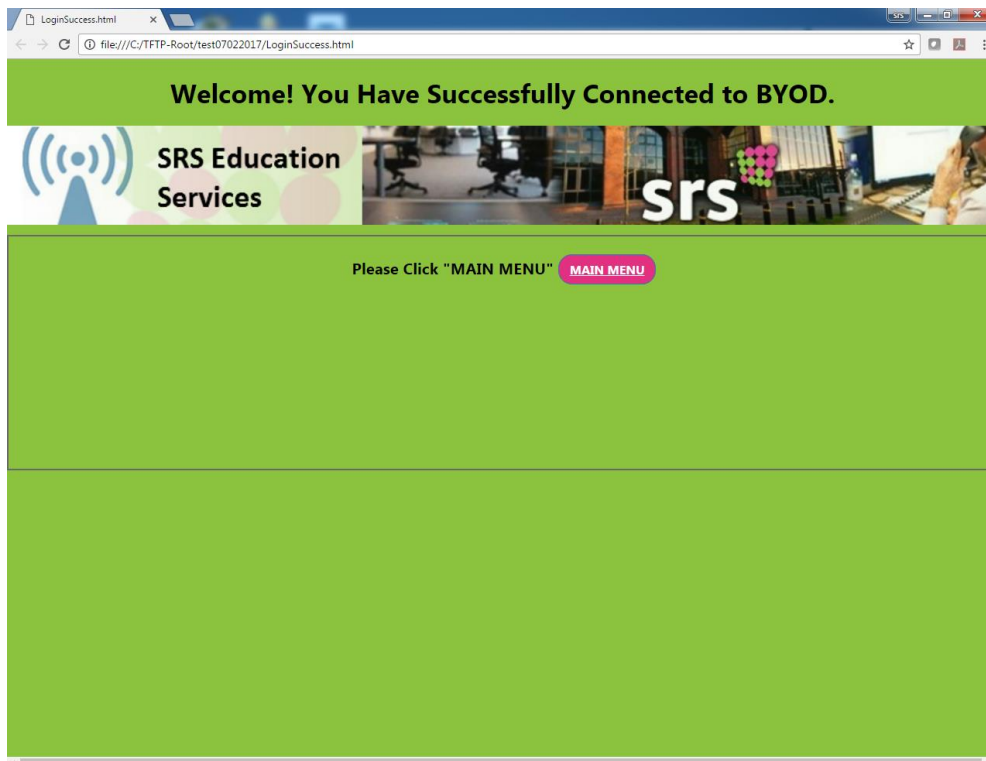

Secondly an Internet Browser should open automatically for Authentication onto the Network. If the Internet Browser does not open automatically then please open the Internet Browser manually. If the Web Authentication Window hasn't appeared please type [www.bbc.co.uk](http://www.bbc.co.uk) into the web browser which will redirect you to the Login Page:

Please enter your BYOD user name and password. Then Click on “I Agree with the Policy Below” (You cannot press enter or go)

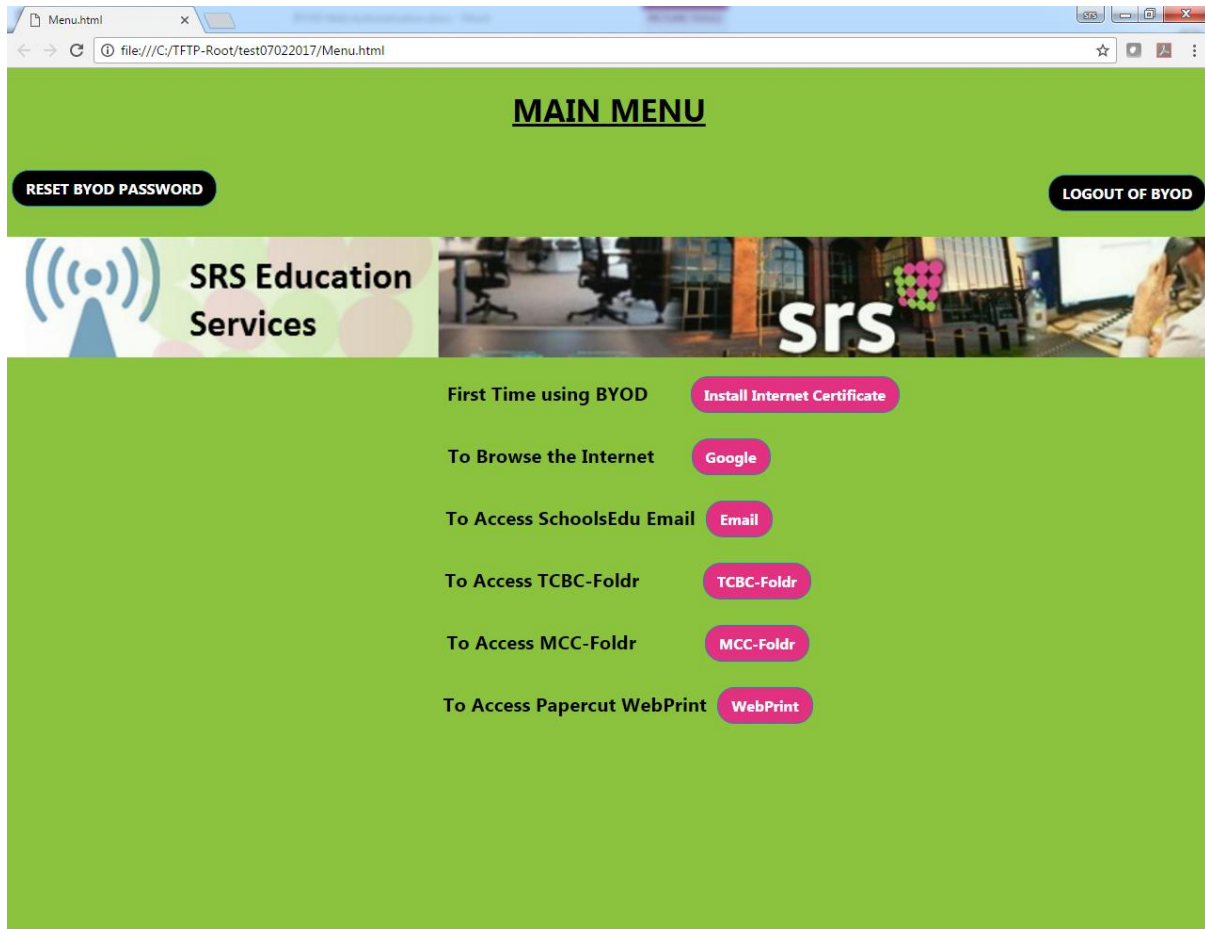

Once you have successfully logged in you will receive the following Web Page

You are now successfully logged into BYOD. If this is your first time logging in then change your password. You can now begin searching the internet or utilising installed applications on the device.

However for ease of direction you can access the “Main Menu” Page to access useful services on BYOD:

It is useful to keep the “Main Menu” Window open to be able to “LOGOUT OF BYOD”. If a user does not Logout of BYOD then the session will remain active for 12 hours until the Authentication Process needs to begin again.

**NOTE –Chrombooks can now connect directly to the SchoolsEdu Infrastructure using the MON BYOD . The menu will not appear automatically on Chromebooks. It is recommended that you use the Chrome Management Solution to deploy an icon on your Chromebook.**
