

Year 7 Science – End of year Assessment

Year 7 will be sitting their end of year Science assessment on April 26th. This assessment will be testing their knowledge, understanding and application of the practical skills covered in the KS3 course, which are also those tested during the GCSE Science written and practical exams.

Students have undertaken a wide range of practical tasks within the Year 7 course and have had the opportunity to develop the skills which will be tested. Alongside their exercise books, pupils may like to take advantage of the GCSE website below which is directed towards scientific investigation.
